Addendum to "HARDY AND RELICH INEQUALITIES IN FRACTIONAL DIMENSION"

by

BARRY SIMION, *J. Operator Theory*, 9(1983), 143–146

I have been informed by H. Kalf that the inequalities in the above paper are special cases of the inequalities that appear on page 49 of U.-W. Schmincke, Essential selfadjointness of a Schrödinger operator with strongly singular potential, *Math. Z.*, 123(1972), 47–50, and on page 192 of H. Kalf, U.-W. Schmincke, J. Walter and R. Wust, On the spectral theory of Schrödinger and Dirac operators with strongly singular potentials, Proc. Symposium on Spectral Theory and Differential Equations, Dundee 1974, *Lecture Notes in Mathematics*, 488, pp. 182–226, Springer, Berlin, 1975 (W. N. Everitt, ed.).
